J Boyd

Slinger, WI

E-rate is crucial to the affordability of the bandwidth that our districts need to support digital learning. We have not qualified for tier 2 funding in the past, so we would request that the funding levels for for all be increased. All schools must have access to high speed internet connectivity --please support e-rate! More and more learning occurs on line, and much of it is constantly interactive between the student and the host. That requires more robust bandwidth. Please raise the funding to coincide with the higher connections required.
